Professional Summary

Second-year Electrical Power Engineering student at Benha University with hands-on experience in industrial automation, PLC systems, low voltage panels, and full-stack web development. Completed intensive professional training with Schneider Electric, HA Consulting Group, MAM Engineering, and ITI. Passionate about integrating electrical engineering fundamentals with smart automation and sustainable technologies. Actively seeking an internship in Industrial Automation, Control Systems, or Smart Energy Solutions.

Education

Bachelor of Science in Electrical Power Engineering - Benha University (Expected: June 2028)

Relevant Coursework: Control Systems, Electrical Machines, Power Electronics, Power Systems Analysis, Digital Logic Design, Microcontrollers.

Professional Training & Experience

MAM for Engineering Industries - Low Voltage Panels (July–Aug 2025)

- MCC, ATS, Power Factor Correction panels assembly and testing
- Safety and quality assurance procedures

HA Consulting Group - Automation & Control Program (July–Sep 2025)

- Classic Control (Excellent)
- PLC Programming (Excellent)
- Motor & Drive Systems (Excellent)

Schneider Electric University - Energy Efficiency Training (July 2025)

- Active Energy Efficiency Using Speed Control

ITI - Full Stack Web Development (Aug 2025)

- PHP, Laravel, MySQL, HTML, CSS, JavaScript

Projects

Smart Two-Tank Water Level Control System

- PLC-based automated water level monitoring system
- Sensors, actuators, control logic implementation
- GitHub: <https://github.com/Eslam20055>

Technical Skills

Automation & Control: PLC, MCC, ATS, Classic Control, Motor Drives

Electrical: Power Systems, Machines, Energy Efficiency

Software: PHP, Laravel, MySQL, HTML, CSS, JavaScript, Git

Languages

Arabic (Native),

English (Professional)
